Subject: Funding for Iowa Flood Mitigation Program

Iowa Flood Mitigation Board Members -

It is my understanding that the Flood Mitigation Board will meet on February 28th, 2014 to discuss appropriations for the Flood Mitigation Fund. While representatives from the City of Sioux Rapids will not be able to attend this meeting, I want to express the interest of the City of Sioux Rapids in funding assistance through the Iowa Flood Mitigation Program.

Sioux Rapids is a small community of 775 people located in Buena Vista County. An engineering firm has recommended the construction of two retention basins to minimize the flooding that often occurs in the residential and commercial downtown areas following heavy rains. The City of Sioux Rapids will be exploring options for funding assistance on this project with hopes that monies will be available for assistance through the Iowa Flood Mitigation Program.

Thank you for your consideration in this matter.

Diane Teno

Sioux Rapids City Clerk
